=====
1.0 Introduction

=====

This document contains the release notes for the C3PR v2.9.3 release.

This is a point release that fixes some minor issues also has feature enhancement to existing Use Cases

1.1 Description

For information, refer to:

<http://gforge.nci.nih.gov/projects/c3prv2/>

Wiki:

<https://cabig-kc.nci.nih.gov/CTMS/KC/index.php/C3PR>

1.2 History

C3PRv2 has been released
C3PR v2.5 has been released
C3PR v2.8 has been released
C3PR v2.9 has been released
C3PR v2.9.1 has been released
C3PR v2.9.3 is pending release

=====

2.0 New Features for this Release

=====

* Grant a user "All Site" or "All Study" for a given role

In 2.9.1, users could only be granted ?All Site? access at the user level and not

* Allow for re-consent of study subjects

In certain case, study amendments require subjects to reassert their participation

* Added a robust advanced search interface

You can use multiple parameters to search for data related to Subjects, Studies

* Generate a query-based report (exporting advanced search results to Excel file)

You can now export advanced search results to an Excel spreadsheet to meet various

* Registration record now includes a view of the subject's study progression

When viewing a registration record, there is a tab containing a graphical representation

- * Improved personnel management user interface
Clearly defined page division with corresponding instructions will make it easier to use
- * Added NCI Enterprise Services for managing subjects and querying registration
You can create, update, and query subjects, as well as query registrations in C3PR
- * Protocol details may be imported or exported using a C3PR web service

3.0 Known Issues

- * When creating a subject during registration, entering an invalid phone number causes an error
- * In Suite mode, broadcasting a registration to a non-enrolling epoch causes an error
- * In Suite mode, only all lowercase usernames may be used
- * Adding a new line (hitting Enter) in the short title field when creating a subject causes an error

4.0 Bug fixes

Several Bugs have been fixed for this release. For a complete list of fixed, open bugs, please refer the Gforge Bug Tracker

http://gforge.nci.nih.gov/tracker/index.php?group_id=214&atid=995

5.0 Bug Reports and Support

Send email to c3prv2-support@gforge.nci.nih.gov to request support or report a bug.

6.0 Documentation

1.0 Introduction

This document contains the release notes for the C3PR v2.8 release.

This is an point release that fixes some minor issues also has feature enhancement to existing Use Cases

1.1 Description

For information, refer to:

<http://gforge.nci.nih.gov/projects/c3prv2/>

Wiki:

<https://cabig-kc.nci.nih.gov/CTMS/KC/index.php/C3PR>

1.2 History

C3PRv2 has been released
C3PR v2.5 has been released
C3PR v2.8 has been released
C3PR v2.9 has been released

2.0 New Features for this Release

- * Removed the default users from C3PR and added a setup module which shows up t
- * Retrieve 'Arm', 'Eligibility' and 'Randomization' data via PA Service
- * Changed the Study Type to have the full set of values to match with the CTRP
- * Support for PO Services v3.1 using new services providing improved performanc
- * Remove the Create Companion pop-up and instead redirect the user to create co
- * Added summary box for editing a study and subject.
- * Added new Create Registration link on Registration Confirmation page.
- * User can now create PI in the study details tab of the Create Study flow.
- * Allow new user to provide unique username - previously email address was used
- * C3PR now allows duplicate email addresses for Investigators and Staff.
- * Added Create Registration link on the Manage Study (Step 7 - Registrations)
- * Fixed various minor bugs.
- * Blank and '%' searches (in essence the 'get all' searches) for PA/PO do not g

3.0 Known Issues

- * Cannot create Person or Organization with an Identifier that already exists i
- * Organization details screen displays the Primary Identifier against the CTEP
- * Cannot activate Study Site which are added prior to activating a Study.

4.0 Bug fixes

Introduction

This document contains the release notes for the C3PR v2.5 release.

This is an major release that implements new use cases, fixes some minor issues also has feature enhancement to existing Use Cases

1.1 Description

For information, refer to:
<http://gforge.nci.nih.gov/projects/c3prv2/>

Wiki:
<https://cabig-kc.nci.nih.gov/CTMS/KC/index.php/C3PR>

1.2 History

C3PRv2 has been released
C3PR v2.5 has completed 6 iterations in the construction phase

2.0 New Features for this Release

Enhancement features:

2.1 UI Redesign: Now C3PR home page gives a nice dashboard view which has some utility sections for a quick view of the interested modules.

2.2 Subject Demographics: Now C3PR captures multiple races for a subject.

2.3 Enrolment Details: Now C3PR captures 'Payment method' for a subject while registering on a trial.

New Features

2.4 Skinnable UI: Users can choose different skin colors for their UI.

2.5 Companion Protocols: Now C3PR provides a way to add embedded or standalone protocols. Registration module also ensures that correct business rules are applied while registering a subject to a study which has companion protocol(s).

2.6 Notification: Now C3PR provides a sophisticated rule based notification module. Users can create notification with a variety of flavors and events and configure the recipients depending on their role. Notifications are also shown on the dashboard which helps users see the notification when they log in to the application.

2.7 Password Policy: C3PR provides a way to reset forgotten password.

2.8 PMRP Integration: C3PR integrates with PMRP and allow PMRP users to see subject details in C3PR application.

3.0 Known Issues

3.1 Imports: Import Registrations/Studies have not been updated and are not currently working.

3.2 Taking subject off study for companion registrations has issues.

3.3 Image Url site banner in configuration page cannot be empty.

3.3 IE 7 Issues:

-> Cannot create Research staff/Investigator from prototype window in study flows.

-> Help icons and Buttons are not rendering accurately on certain screens.

There are minor issues while sending mails.

Introduction

This document contains the release notes for the C3PRv2 Ccts release.

This is a transition release that fixes some minor issues also has feature enhancements
Use Cases

1.1 Description

For information, refer to:

<http://gforge.nci.nih.gov/projects/c3prv2/>

Wiki:

<http://gforge.nci.nih.gov/plugins/wiki/index.php?id=214&type=g>

1.2 History

C3PRv2 has completed 4 iterations in the elaborations phase
C3PRv2 has completed 10 iterations in the construction phase
C3PRv2 has completed 2 iterations in the transition phase

2.0 New Features for this Release

Enhancement features:

2.1 All the CTEP organizations are loaded into c3pr. The user can now create ad registrations at any of these organizations.

2.2 Help text has been added to most of the fields for explanation and context.

2.3 Notifications for accrual thresholds based on user roles are now functional.

3.0 Known Issues

1. Edit Study Flow: In the edit study flow, the system first shows appropriate (epoch names, arm names, diseases, investigators, study sites, study personnel) but doesn't show a user-friendly message even if these values are updated unless re-enters the flow.

2. Import Study/Registration : The system doesn't show user-friendly messages y

3. The delete icons are clickable on disabled pages.

3.1 C3PR Recommended JDK Version:

It is recommended to use Java 5.0 update 9 or later. For more information, visit Sun's website

http://java.sun.com/javase/downloads/index_jdk5.jsp

3.2 Emails.

4.0 Bug fixes

Several Bugs have been fixed for this release, most notably are UI level validations and the Advanced Search. For a complete list of fixed, open bugs,

Please refer the Gforge Bug Tracker

http://gforge.nci.nih.gov/tracker/index.php?group_id=214&atid=995
